PROJECTS

CROWDFUNDER

Tech Used: Python | Django | SQL | HTML5/CSS3

- Built a Kicstarter clone in a team of 4, applying best practices for version control, branching and merging through Git / Github.
- Developed features such as users creating a project with a donation goal and reward tiers, and also ability to donate to projects for specific reward tiers.
- Personally focused on the authentication and authorization for whole site, creation and integration of user profile model, and general debugging and merge conflict resolution.

PHOTOGUR

Tech Used: Python | Django | SQL | HTML5/CSS3

- Constructed an Instagram clone utilizing a SQLite database for user profiles and pictures, along with all the CRUD functionalities for uploading, editing and deleting pictures and comments.
- Built a fully functioning search bar, providing the ability to look for pictures by title or artist name.

EXPERIENCE

GENERAL ASSEMBLY - TORONTO, ON
WEB DEVELOPMENT IMMERSIVE (July - September 2019)

- Currently working through an intensive 12-week program focused on programming fundamentals such as object-oriented programming, the MVC framework, Data Modelling, working with API's, version control through Git/Github and project planning for teams.

WINDSHIELDINK
PUBLIC RELATIONS ASSOCIATE (June - November 2017)

- Worked with leadership team to develop brand image for a mobile application that portrayed an emotional and rational value to users beyond the technical specifications.
- Led the launch and messaging of social media platforms such as Instagram and Twitter, and organized a contest, which boosted total followers by 40 per cent.

EDUCATION
